It was preceded by the laughable farce of the "Irish Post," which gave universal satisfaction, and in which Mr. Coilins was obliged to repeat the favorite song of "Widow Machree" three times. To night will be performed an entirely new drama, expressly written for Mr. Coilins, entitled "Irish Honor, or Dublin Days in 1765," in which Mr. Coilins will sustain the principal character of Major Bagenal O'Daly, and will, deliver several favorite-songs. This drama is an entirely new production, and of the most interesting and amusing character. BURTON'S THEATRE. - This house was crowded again st night. The farcical play. "The Serious Pamily." has now been performed over one hundred nights, and if we may judge by the audiences, is as attractive as if we may judge by the audiences, is as attractive as ever. It was well performed last night, Mrs. Russell sustaining her original character. To night is conse-crated to "Dombey," as usual on Thursdays, and a full house may be expected. The drama is very amusing, and is always received with enthusiasm and satisfac-tion. "An alarming Sacrifice," another amusing pro-duction, will also be represented, the whole forming a great treat for the lovers of the humorous and gro-teque.

NATIONAL THEATRE.-The thrilling, the terrible, the ing, the pathetic, are well enseted by Mr. Marshall the National; he is certainly a great actor, a fine gure, and has, withal, more nature and feeling in in than belongs to the terrific Forrest school in ge-ral. The National is crowded nightly, and no won-tr, the attractions are overwhelming.

Asron Place Theatre.—Sheridan Knowles's cele-

erated play of the "Hunchback," was performed last wening at this beautiful theatre, before a highly fashudience. Mise Julia Dean, who performed the part of Julia, was truly admirable and truly pathetio in the scene where her lover, Sir Thomas Clifford comes to her in his lowered state, as the humble Secretary of his lordly rival; as also where she tells Master Walter to free her from the contract which blinds her to the hated lord—she was indeed thrilling and empassioned. This Indian Concern —On Friday evening, the Indian Family will give their second concert at the Tabernscle. The entertainment is very novel and interesting, and will attract largely. The voices of these children of nature are very sweet, and their rude minstrelsy full of originality. We learn that it is the object of the family to travel through the country to obtain a knowledge of our manners and habits, with a view to the elevation of the Indian character, now only semicivilised. The object is commendable, and the family should be encouraged.

Catronnia Cura.—The members of the Club held an adjourned meeting last evening, at Central Hall in Grand street.

Arrangements were made for a grand ball, to be given at Tammany Hall on the evening of the 25th inst. The ball is a glorious idea; if the beautiful girls that belong to the two actions of the democratic party cannot unite the two factions, then nobody cise can; and the hunkers and free-soilers may make up their minds to travel in opposite directions for the balance of their political lives.

Mr. Surrman made a speech to the club, and of source went it strong for union and for the admission of California into the Union. He dwelf strongly upon the sacred rights of the people to form a State when they pleased. He might have cited a case in point; for instance, instead of 20,000 people going out and settling upon the territory of the United States in California, forming a constitution and claiming to be a State, but should have supposed the case of 20,000 people from New Tork city, citizens, Irish, Dutch and French immigrants, fresh landed, going over and taking possession of Governor's Island, adopting a constitution, forming a State, electing a governor, Legislature members of Congress, and two United States Senators, and demanding instant admission as the State of Governor's Island into the Union. The last would have been a Sappy illustration of the according to the adventurers to California as fully as he might have done.

## MONRY MARKET.

WEDNESDAY, April 17-6 P. M. The stock market to-day yielded slightly to the pres ure of currency changes, and holders manifes siderable anxiety to part with their investments. The brokers, after the board, were a little pale, and the plating the fading margins, illustrated pretty plainly the perils of speculation. The public know but little of the wire pullers of the Stock Exchange—they know less of the ways and means resorted to, to get up an artificial state of things. They would hardly credit the truth were they to hear it, as to the manner things are done there. The human beings congregated on the corner of Hanover street and Wall are brokers, dealing in thousands of shares of fancy stocks daily—Such an idea naturally leads to the conclusion that capital and credit are to be found in abundance, and that all the dealings are legitimate and proper. A

careful investigation into the facts of the case, preve the entire absence of both of these trifling indispensabies. Neither capital nor credit prevails in any great abundance, and yet these distinguished traders wil manage to blow up a stock bubble when the air is in a proper condition to receive it—full of all kinds of de-structibles—sure to explode, and sure to carry trouble, disaster, and loss on every side. We do not hesitate to express our belief that this game has been played with success this year than ever before. The brokers themselves are the holders of these worthless stocks The public have dealt in them less than at any former period. The decline now about commencing will damage this class ten per cent where the outsiders will

There is one feature in the late speculation worthy of particular notice. The Philadelphia brokers have been the most prominent buyers of our stocks. Those who remember the usual influence exercised by these people heretofore, will also remember that they lose their margins in Wall street. When they bite sharp, the New Yorkers spare them some-when they be-come a little indisposed, why, at reduced rates, they are relieved of their troubles. We commend to the particular attention of the New York brokers the fact that this little amiable civility will be required of them in a short time, and they must be prepared to do it up about right.
